Advanced User Interfaces

Making complex tasks simple, effective and intuitive - while meeting strict requirements for security and integration.

I have experience working with advanced interactive systems both on both a digital and a physical level.

Data Visualization

Visualizing data to bring clarity and understanding to static or live information for your customers, employees or partners.

Generative Systems

The ultimate in interactive experiences.
From small research projects to
permanent installations.

I do concept-development and
prototyping of generative structures.

Design for Web & Software

With more than five years of experience and several awards in the field of digital media - I can help you design and prototype modern media such as apps, websites, intranets and more.
